

# Complete Guide to Black Jaguar

*By Russell Turner*

This is a rare sight in the. The jaguar (*panthera onca*) is a large cat species and the only living member of the genus *panthera* that is native to the americas Its distinctively marked coat features pale yellow to tan colored fur covered by spots that transition to rosettes on the sides, although a melanistic black coat appears in some individuals Black panthers of both species have excess black pigments, but their typical rosettes are also. Learn how to distinguish between black panthers, which are melanistic big cats of different species, such as jaguars and leopards Black jaguars live alone, marking their large territories with their scat and by leaving distinctive claw markings on trees
